

Les Jeudis de l'UMR

MARDI 20 MAI 2025 / 11h30 **Mary ONTOMWA**,
Senior Research Scientist at the Kenya Marine and Fisheries Research Institute (KMFRI)

Characterisation of the Kenyan fisheries, opportunities and challenges for improving their management

The presentation will cover a brief description of KMFRI and the research conducted specifically my MSc. work research on hook size selectivity in the hand line fisheries. The aim of this work was to assess the selectivity of fishing hooks used by artisanal fishers to evaluate the impact of hand line hooks on fish stocks. The presentation will also entail part of my PhD work on biomass estimation and stock assessment of pelagic fish of Kenya's marine waters. The work assessed catch rates and biomass for the industrial long line fishery and described assemblages for the pelagic fisheries.
